Stabilock Endotracheal Tube Holder

HELPS PREVENT ACCIDENTAL EXTUBATION, ALLOWS ACCESS TO MOUTH FOR ORAL CARE AND OFFERS MANY OTHER CLINICAL AND PATIENT ADVANTAGES.

The Dale Stabilock Endotracheal Tube Holder provides reliable stabilization of endotracheal tubes (sizes 7.0-10.0mm) following intubation. It helps prevent accidental extubation especially during patient transport.

ADHESIVE BASE

With four placement options for its Adhesive Base, the Dale Stabilock Endotracheal Tube Holder covers the full spectrum of patient needs -comfortably and securely.

- Easy tube repositioning
- Gentle on delicate skin with no irritating-to-remove residue
- Can be left in place for up to 3 days
- Easily modified and simple to apply
- Not made with natural rubber latex.

TUBE CHANNEL

- Allows easy access for oral care
- Prevents kinking or flattening of tube
- Minimizes ET tube movement and helps prevent accidental extubation

RECOMMENDATIONS

- Reposition the endotracheal tube often to help prevent injury to the lips and underlying tissues due to unrelieved pressure.
- Support the ventilator tubing to reduce pressure on the patient's face.
- To prevent skin ulcerations or skin tears, assess patient skin and medical conditions prior to applying. Monitor daily or more frequently.

ORDERING INFORMATION

Product Number	Size	Quantity
270	Stabilock Fits endotracheal tube sizes 7.0mm-10.0mm	10 per box
273	Adhesive Base	10 per box
